

GET THE MOST OUT OF YOUR SOYBEANS

Independent researchers have discovered **BILLIONS** of dollars in corn value hiding in soybean variety selection.

When soybean nutritional quality is high, corn demand automatically increases in livestock feed.

Up to 3.8% more corn.¹

And when soybean value and corn demand go up, synthetics can go down, meaning less greenhouse gasses.⁴

Think across the barnyard.

Get more corn out of your beans at soyvalue.com. Check out our rankings of soybean varieties that help boost corn demand and livestock sustainability, and order your sample test kit to see how your beans stack up.
