

# HOW MUCH CORN ARE YOU GETTING OUT OF THOSE BEANS?

Independent researchers have discovered **BILLIONS** of dollars in corn value hiding in soybean variety selection.

When soybean nutritional quality is high, corn demand automatically increases in livestock feed.

Up to 3.8% more corn.<sup>1</sup>

And when soybean value and corn demand go up, synthetics can go down, meaning less greenhouse gasses.<sup>4</sup>

## Think outside the bean.

Get more corn out of your beans at [soyvalue.com](https://soyvalue.com). Check out our rankings of soybean varieties that help boost corn demand and livestock sustainability, and order your sample test kit to see how your beans stack up.
